

Yanick Boucher Brings Home X Games Silver!

Three years ago we signed Yanick to a contract to come race snowbikes for us. In that time he has won back to back CSRA championships for us and now, a Silver Medal at the Winter X Games. X Games has hosted snowbike racing for three years now and as you may know, only the best athletes in the world are invited or earn the right to be at these games. Yanick is one of them and now has joined a select group of athletes to step on to the podium at the games. A great accomplishment for him and our entire team.

On the recent success at X Games, team owner Stuart Hunt said that, "I am very proud of all our accomplishments over the years, of the team we have become and now we get to add an X Games Silver medal to the list. Congratulations Yanick, you earned this! Enjoy the moment, I know your future holds many more in the years to come. "

We have been racing in the sport of snowcross for 20 years now, with almost 30 championships to our credit. We were the first team in our series to support the new sport of Snowbike racing four years ago and in that time we have earned 3 Pro and 1 Sport Snowbike Championships. The sport has come a

long way since it started. We now see the fastest Snowbike racers able to turn laps as fast as or even faster than any snowcross racer in the sport. We are happy to have been a part of growing this sport, looking forward to what the future has in store.

You have heard the saying, “Teamwork makes the dream work”. (John Maxwell) It is so true.

Over the past four years we have worked exclusively with Yeti Snow MX and Derek Uttley at Flybyu Motorsports to pull our program together and have been actively working at improving it ever since. “Thank you Derek for all the hard work and determination, this medal equally belongs to you!”

We have had great support from Husqvarna Motorcycles and our dealer at St. Onge Recreation that have supplied the bikes that power our effort. Behind that is a long list of partners that help support us with everything we need to make the “dream work”. Special thanks to the crew at The Compound for building us our practice track, to Motul USA for backing us with the best lubricants in the business. To HMK USA, Tekvest, Troy Lee Designs, Scott Goggles, Deft Family, Atlas, HCP Designs and Team LTD for the race gear and clothing. To 139 Designs for helping make our bike look so sick! Thanks to Rox Speed FX, Ohlins suspension, C3 Powersports, Tekmo, and Flo Motorsports for their great products. To Wallace Chevrolet, Cadillac, Buick, GMC for backing us with our rig and support vehicles. To the Otsff Sports Marketing Group and to Rockstar Energy Canada.

Last but not least, thank you to our families for their unconditional support, we could not and would not be here without you.

YANICK BOUCHER

What a day it was at X Games 2020! Still can't believe we were able to earn a silver medal at X Games! This was something I have thought so much about in the last couple weeks leading up to this. I felt great out on the track from the get go in practice, getting 4th in the time qualifying. At that point I knew that if I could get a good start and ride a good race I could have a shot at the podium. In my heat race I got a good start into 2nd and rode smart in that spot knowing that would get me a good gate pick in the final, but on the last lap the leader crashed into a downed lap rider, I was then able to take the heat race win. It felt good to get that out of the way and it would give me first gate pick in the final. We were then set for the 12 laps final! Nerves were pretty high heading to the start line but I was able to focus and get a great start into 3rd, the first couple laps were pretty intense with a lot of battling going on. I stayed strong and came out 2nd on the third lap from then on I had to deal with pressure from behind I could hear a bike not far away heading into corners, I knew I had to give it everything I had if I wanted to hold on to that 2nd spot. A few laps later I couldn't hear the bike behind me anymore, I kept on pushing to maintain the gap I had on 3rd place. Once I saw the white flag come out I took a good look back to see how much of a gap I had, I knew I didn't have to take any unnecessary risks on the last lap. When I crossed the finish at the checkered flag I was so relieved! The excitement level was at an all time high for me coming into the start area where my mechanic Derek was as well as Stu and my family. It was such a great moment knowing that we got it done! The emotions I was going through was something I had never experienced before! This was a dream of mine as a kid watching snowcross at X Games on TV, couldn't believe that it was now happening to me, a moment I will never forget!! I gotta give it up to everyone that has been behind me along this whole journey! My team Bailey Motorsports and Stuart Hunt for giving me this opportunity on snowbikes a few years ago, Derek at Flyby Motorsports for the countless hours he has put into my bikes to have them tuned perfectly, the whole Yeti Snow MX team for providing me with the best snowbike kit there is out there! My family and friends for everything they've done to get me to this point. As well as all of our amazing sponsors! Wouldn't be possible without all you guys!!

Thank you

Yanick Boucher

On working as part of the Bailey Motorsports Team, Derek Uttley had this to say:

Getting to the podium in Aspen 2020

The level of completion increases significantly each season in snowbike racing. The snowbike racers are now, quite often, carrying speeds faster than snowmobiles when racing on the same track. The skill level of the racers as well as the development of the motor and chassis of snowbikes is progressing at a rapid pace.

Last season in the first corner of the X-games final there was a racing incident that forced Yanick to not continue. From the next day on we kept working forward. The bike continued to evolve as we implemented new ideas of our own as well as working with the engineers at YetisnowMX. This season we found gains in horsepower with trying new ideas and weeks of testing on the dyno and on track. Motul 300V has been keeping our engines reliable with the added stress of the more powerful motor. The Ohlins forks are working absolutely amazing with some calibrations tuned specifically for snowbike racing.

Yanick spent many days at The Compound and ERX honing his skills and testing new engine and chassis configurations. We were actually testing new engine and suspension configurations that were utilized in the 2020 X-games race right up to the few days before prior, while riding in Crested Butte Colorado. I actually assembled the last motor configuration the night before practice when we arrived at Buttermilk ski hill in Aspen Colorado, home of the 2020 Winter X-games.

One of the most exciting things for me is learning about and growing a new motorsport. I've had experience with engine building and suspension tuning for both motorcycle and snowmobile throughout my career. Having these skills has aided in moving forward with snowbike set up and performance.

It has been a crazy journey with ups and downs, many broken parts, many ideas used, but many that didn't work as intended. You learn from these things and keep moving forward.

Snowbike racing has come so far in a very short period of time. I couldn't ask for a better team owner to work with than Mr. Stuart Hunt, or a better rider to travel North America with than Yanick Boucher. Both of

them put so much effort and resources into this journey that landed us on the podium this year.

We have so many top notch sponsors that help us succeed with our racing goals. There are a lot of moving parts in a race team. "You can't be late for racing" is something I often say. There are no excuses, you're either ready or you're not. Having sponsors that supply us with excellent products that stand the abuse of racing and getting the product to us on time is key. Without these companies by our side it would be impossible to succeed.

What a ride! Seeing Yanick finish the race on the podium at Winter X-games was something I will never forget. He was so freakn' happy, and I was so happy for him. All the hard work paid off. I can't wait to see what we are able to do next!

Derek Uttley.

WE did it!
